PROFESSIONAL SUMMARY

Final-year MCA student (graduating 2027) with a strong foundation in full-stack web development, databases, systems programming, and applied AI/ML. Comfortable working end-to-end — from database schema design and backend APIs to front-end UIs — with hands-on experience across Python, JavaScript, PHP, and C. Practical exposure to computer vision (image colorization with a deep-learning model), network protocol analysis, and security-focused tooling. Strong analytical and problem-solving ability, a quick learner across new stacks, and experienced in team collaboration and event coordination.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, PHP, C, SQL

Web & APIs: HTML, CSS, Bootstrap, Flask, REST APIs, JSON

Databases: MySQL, MongoDB, SQLite — schema design, queries, data integrity

AI / ML & Computer Vision: OpenCV, Caffe (pretrained deep-learning models), NumPy

Networking & Systems: TCP/IP fundamentals, TLS/SSL handshake analysis, Wireshark, C/SDL2 systems programming

Tools & Platforms: Git/GitHub, VS Code, XAMPP, Linux & Windows environments

Core CS Foundations: Data Structures & Algorithms, OOP, DBMS, Operating Systems, SDLC

PROJECTS

AI-Based Image Colorization | *Python · OpenCV · Caffe (Deep Learning) · NumPy*

- Built a system that converts grayscale images to realistic color images using a pretrained deep-learning model integrated via OpenCV's DNN module.
- Collaborated with a co-developer under faculty supervision, covering the full pipeline from design to a working demo, report, and presentation.

OutfitOn — Online Cloth Rental System | *PHP · MySQL · Bootstrap · JavaScript*

- Built a full-stack rental platform with customer, vendor, and admin roles, covering booking, cart, and order-management workflows end-to-end.
- Designed the relational MySQL schema and implemented secure, role-based authentication.

ScanSecure — QR Tampering Detection & Analytics Platform | *Python · Flask · SQLite · OpenCV*

- Built a Flask application combining image-based tampering detection (OpenCV) with rule-based URL security analysis and an analytics dashboard.
- Automated PDF/Excel report generation, turning raw detection data into business-ready output.

Smart ATM Finder | *JavaScript · Leaflet.js · OSRM · Geolocation API*

- Built a location-intelligence web app combining live geolocation, routing, and a cash-availability heatmap to recommend the best nearby ATM.
- Deployed a live demo on GitHub Pages with a fully responsive UI.

Fly-Bird-Pro — 2D Game Engine | *C · SDL2 · SDL_mixer*

- Built a Flappy-Bird-style game in C with a state-machine architecture, physics-based movement, audio, and persistent high-score file I/O.

EDUCATION

Master of Computer Applications (MCA) — Final Year, Expected Completion 2027

CGPA: 8.20

Ramaiah Institute of Technology, Bengaluru

Bachelor of Computer Applications (BCA) — 2025

CGPA: 8.81

Kamadhenu BCA College, Karnatak University, Karwar

LEADERSHIP & EXTRACURRICULAR

- Core Organizer, Abhyuday — Flagship inter-college technical fest run by the MCA Department, RIT Bengaluru: coordinated event logistics, vendor/venue arrangements, and cross-team scheduling across technical and non-technical events.

KEY STRENGTHS

Problem-Solving & Analytical Thinking • Independent Ownership with Minimal Supervision • Cross-Team Collaboration • Quick Learner & Adaptable • Clear Technical Documentation
